EDUCATION

CADT
BACHLOR DEGREE OF COMPUTER SCIENCE

2023 - PRESENT

SKILLS

- Python
- PostgresSQL/MySQL
- MACHINE LEARNING
- TypeScript (Nest.js)

LANGUAGE

- KHMER : NATIVE SPEAKER
- ENGLISH : ADVANCE
- CHINESE : FLUENT

PROFILE

I am a passionate and driven individual with a strong interest in machine learning. With hands-on experience in building practical solutions like speech recognition tools and license plate detection systems. I am able to work independently in busy environments and also within a team setting. I am outgoing and tactful, and able to listen effectively when solving problems.

PROJECT EXPEREINCE

- **CADT - Khmer ASR Tool**   2025 JANURARY- PRESENT
  Machine Learning Enigneer
  Develop an Automated Speech Reconigition for Khmer, designed to transcribe spoken language into text. The tool will include features for real-time transcription and text editing

- **Camcyber - Point of Sale System**   2024 - PRESENT
  Full Stack Trainee

  Developed an additional CRUD function for a new category, created a telegram notification bot, notifying on each purchase, and designed a template for sales report.

- **Car Licence Plate Detection**   2024 - PRESENT
  Data Engineer

  Developed a machine learning model to detect license plate and performs Optical Character Recognition (OCR) for the plate details.
